I thought you might want to learn more about

Cushing's Disease/Syndrome

Cushing's Disease/Syndrome is an endocrine or hormonal disorder. It usually occurs when the adrenal glands release too much of the hormone cortisol into the body for long periods of time. This may be caused by a tumor or tumors of the pituitary gland or the adrenal gland.

Excess steroid use from prescribed medications and ectopic tumors may also cause Cushing's.

Do you suffer from one or more of the symptoms listed on the back of this card?
